DETOXIFYING AND ALKALIZING YOUR BODY'S PH FOR OPTIMAL HEALING

Can your WATER change your life?

When Ronnie Ruiz found out that his mother was diagnosed with lung cancer he was devastated. Because Ronnie had a 21 year background as a power-lifter, bodybuilder, nutritional researcher and was a big believer in alternative health, he wanted his mother to treat her cancer with alternative methods. The problem was that throughout his many years of study he had nothing to offer his mother that would directly address her stage-four cancer. Ronnie became obsessed with alternative cancer research, and spent up to eight hours every day researching on the computer. After six months of this Ronnie had found only one product that had enough background, history, and clinical use to recommend to his mother... By the time Ronnie was confident enough to present Ionized Water to his mother, it was too late. She passed away shortly thereafter.

Ronnie's curiosity about this special water continued to grow. Since he had already purchased an ionizer for his mother he began to use the water himself. Not only did he use the ionized water, but he also began to do many tests and experiments with it. Ronnie's curiosity quickly turned into confidence and excitement. "The results of my personal trials and testing were astounding!" says Ruiz, "In 21 years of buying health commodities, powders, and pills, I have never experienced such dramatic results from a single product."

A water ionizer is an electrical device about the size of two loaves of bread that sits on your counter-top, or can be installed under your sink. Most people can install one in their kitchen in less than 15 minutes. In the ionization process, tap water is thoroughly filtered and then treated with electricity; this process is called electrolysis. The water that comes out of the ionizer is electrically charged, alkaline, ionized water and its effects are nothing less than miraculous!

Alkaline Ionized water is up to six times more hydrating than conventional water. The size and shape of the water molecule cluster is reduced through the ionization process, and this resulting smaller water cluster is able to pass through smaller passages in your body's tissue. People that consume this alkaline ionized water often report being able to "think" better, sleep better, and have more energy, among many other various benefits.

The electrical charge produced in the water transforms it from regular neutral water into an extremely powerful antioxidant, which enables it to pull toxins from your body. Like other antioxidants, this water is able to influence many illnesses, especially those that have any form of inflammation.

"Out of all the health routines, special diets and supplements on the market today, I have seen no single product with more potential for hydrating, neutralizing Acids and detoxifying the body than Chanson Ionized alkaline water. Every health routine needs to start with proper hydration but all waters are not created equal. Chanson Ionized Alkaline water can address most of the common reasons for disease which are; Dehydration, Acidification of bodily fluids and Oxidation of cells." Jonathan Dashiff, MD

When the minerals in the water are ionized, your body is able to absorb and use them much more efficiently. In comparison, drinking reverse osmosis or distilled water will lead to mineral deficiencies in your body, as these types of waters are stripped of minerals. Ruiz has tested tap waters, filtered waters, and most bottled waters on the market with high tech lab equipment such as ORP meters and sophisticated Ph meters - he has found that bottled waters are actually acidic and have highly oxidizing effects! Most bottled water is acidic and very damaging to the body's immune system, with an effect of actually inviting sickness and disease.

There is also a second miracle water produced by the ionizer and that is "acidic" water, which is also made at the time of electrolysis. Although it is not for drinking like the alkaline ionized water, acidic water has over 500 external uses! This amazing ionized acid water can replace at least 50% of your current household chemicals, cleaners and skin care products, and will actually take lines and wrinkles off the face!

Acidic Ionized water made by Chanson Water ionizers has been independently lab tested, and found to kill e-coli and staph bacteria on contact without the addition of any chemicals or salt solutions like some competitors use. In addition to disinfecting effects, this water can transform your skin and treat everything from acne to toe fungus with fast and clear results.

Ionized water has been used in Japanese and Korean hospitals for over 30 years and USA studies have been published by the universities of Georgia, Florida and Texas. Switching from bottled water to ionized water is not only the best move for ones health, but is a true "Green" action. Ionized water can help the planet by reducing landfill waste and your carbon footprint. The switch can also make your home a much safer place by eliminating unneeded chemicals.

Ronnie Ruiz, a renowned ionized water expert who has personally tested more water ionizers than anyone, founded Chanson Water in 2007. Chanson Water is a water health company committed to helping both sick and healthy people with the most innovative water solutions available. Chanson Water is NOT a multi-level marketing company, and offers great dealership opportunities. In addition, Chanson ionizers carry a lifetime warranty.

Chanson Water offers water ionizers, advanced water filtration, whole house water filters, tankless nano filtration systems shower filters, and salt free water softeners. Chanson ionizers have a lifetime warranty. "The most thrilling thing is that not only was our life changed, we now change lives every day for both our customers and our dealers. It is very fulfilling to see the customer health testimonials that come into our office nearly every day," announces Ruiz, "If you have not tried this water yet, you're missing out big time."
